Oocyte Preparation

- Enjoy the optical quality of SZX2 or SZ2 stereo microscopes in oocyte washing steps;
- Easy and precise droplet setting in ICSI dishes;
- Professionally control vitrification or thawing process of individual oocytes;

Embryo Process

- Conduct your embryo incubation steps with SZX2 or SZ2 stereo microscopes;
- Confidently verify all cryopreservation steps of embryos;
- Comfortably prepare all necessary biopsy – and embryo transfer workflows;

Ergonomic & Comfortable Working Stereo

- Olympus SZ2 and SZX2 stereo microscopes provide optimal zoom magnification ranges and working distances;
- Comfortable eyepieces, zoom click stops, fine focus and contrast techniques are optimized for IVF working profiles;
- A unique ergonomic head with extended eyepieces strengthen your productivity by allowing you to keep a healthy posture;

Integrated Apochromatic System

The apochromatic system-integrated into the observation tubes, zoom body, and objectives-eliminates chromatic aberration throughout the zoom range and helps acquire high image quality without chromatic blur.
